

PROFESSIONAL FIBER OPTIC STRIPPER

DESCRIPTION

The stripper is used to remove the buffer coating with a diameter of 250 μm from the fiber cladding with a diameter of 125 μm . The tool also has a hole with a diameter of 1.98 mm giving the possibility to cut the cable jacket. Thanks to ergonomic design, the tool is comfortable to use. It precisely removes the buffer not damaging the cladding. After completion of the job, the stripper should be locked.

FEATURES

- CFS-2 for stripping 250 and 900 micron buffer coating to expose 125 micron cladded fiber
- Second hole for stripping 2-3 mm fiber jackets
- Pre-set at the factory—no adjustments needed
- Will not scratch or nick glass fiber
- All stripping surfaces are manufactured to precise tolerances to assure clean, smooth strips
- Comfort-grip, ergonomic handles
- Lock to hold tool closed when it is not in use
